June 4 Count Yourself In! • Soyez du nombre! 4 juin

WHAT'S IN IT FOR FARMERS?

On June 4, 1991 – the next Census of Agriculture – stand up and be counted as an important member of Canada's farm community. Farmers have always given the Census their full co-operation; they know what's at stake.

What is at stake? Your capacity for making strong business decisions, your access to quality services, your impact on the environment and more ... depend on everyone's participation in the Census.

How can farmers use Census of Agriculture information? The Census provides the industry overview needed for making business decisions and highlights important farming trends. With the Census as a base, you can evaluate your own agricultural methods (cropping, production and soil conservation), weigh alternatives and act on facts rather than on speculation.

Do you demand quality products and services? You should not have to travel far to get quality products and services. You benefit when companies specializing in fertilizers, pesticides, feed, fencing, seed and farm equipment use Census data to find out where to locate. A farm equipment company in your community, for example, means ready access to equipment sales, rental, parts and maintenance.

What about the environment? Our environment needs protection. Farmers – like everyone else – are doing their part. The Census identifies farming practices and measures how these practices are changing to deal with environmental concerns.

What about the role of women in agriculture? The 1991 Census form allows for more than one operator to be named to show the reality of women's contribution to the farm industry in Canada. The role of women as decision-makers on the farm will be better reflected in the data.

How else do you benefit from everyone's participation? In the case of emergency situations and natural disasters, Census of Agriculture data are used to quickly locate and identify agricultural areas affected – possibly your area – and to assess the impact of the damage. Associations and unions use the data for measuring the financial well-being of farmers and for lobbying on your behalf. Accurate data from the Census of Agriculture are an important part of the information needed to support government stabilization and price support programs.

Is being well informed important to you? Farm organizations and the farm media use the Census of Agriculture database to report on farm industry facts, trends and developments – details essential for getting the viewpoint of farmers in front of legislators and the Canadian public.

You benefit from the Census ... so take a few minutes on June 4 and fill out your form and mail it back. There's a lot at stake.

FOREWORD

This handbook for Nova Scotia has been prepared to serve as a ready reference on agricultural statistics. It has been a joint undertaking of Statistics Canada, Atlantic Office and The Nova Scotia Department of Agriculture and Marketing.

The greater part of the material contained herein has been compiled from Statistics Canada sources. Acknowledgements made to Agriculture Canada for data which they supplied.

We gratefully acknowledge the contribution made by farmers, processors and others in Nova Scotia's agricultural industry. Without the information supplied by these operators to mailed and enumerative surveys, this book would not be possible. We hope the information contained herein will be useful to the producers, processors, farm organizations, Government Departments and others in their planning and policy deliberations.

We would like your input in this handbook. Please feel free to contact us concerning errors or suggested tables and data requirements.

Additional or more specific information may be obtained from the following:

NOVA SCOTIA - AGRICULTURAL STATISTICS

TABLE OF CONTENTS

Table

SELECTED CENSUS STATISTICS

1. Number of Agricultural Holdings, Acreage of Improved and Unimproved Land, Censuses 1976, 1981, 1986.
2. Field Crop Acreage by Counties & Province, 1986.
3. Total Cattle & Calves, Dairy Cows, Beef Cows, Sows and Total Pigs by Counties, Censuses 1976, 1981 and 1986.
4. Sheep, Horse, Goat & Rabbit Numbers, Censuses 1986, 1981 and 1976.
5. Selected 1986 Census Data.
6. Economic Classification of Census Farms, 1986 by Sales Class.
7. Farms Classified by Product Type and by Sales Class, 1986.
8. Census Farms with Sales of \$2,500 or more Classified by Major Product Type by County, 1986.
9. Number of Farms and Agricultural Products Sold by Sales Class, 1986.
10. Number of Farms and Agricultural Products Sold by Type of Farm, 1986.

FARM FINANCIAL INDICATORS

11. Gross Value of Agricultural Production, 1988 & 1989.
12. Farm Cash Receipts from Sale of Farm Products, Atlantic Provinces & Canada.
13. Net Income of Farm Operators from Farming Operations.
14. Farm Cash Receipts from Sale of Farm Products.
15. Farm Operating Expenses and Depreciation Charges.
16. Number of Farm Bankruptcies, Canada and the Provinces.
17. Agricultural Debt Outstanding by Source of Lenders.
18. Farm Input Price Indexes, Eastern Canada.
19. Farm Product Price Indexes, Canada and Provinces.
20. Canadian Prime Interest and Currency Exchange Rates, Monthly 1987-90.
21. Price Series of International Significance U.S. Dollars/Standard Units.

LIVESTOCK STATISTICS

22. Cattle on Farms, July 1.
23. Hogs & Sheep on Farms at July 1.
24. Livestock Balance Sheets, Canada.
25. Livestock Balance Sheets.
26. Hogs Marketed through Nova Scotia Hog Marketing Board by Counties and Province.
27. Fall Feeder Sales.
28. Average Daily Price 100 Index Hg.
29. Per Capita Consumption of Red Meats, Canada.

DAIRY STATISTICS

30. Farm Sales of Milk & Cream, Utilization & Farm Value of Sales.
31. Production of Dairy Products.
32. Active Milk, Industrial and Cream Producers as of August 31 each Year.
33. Dairy Herd Analysis Summary.
34. Per Capita Consumption of Dairy Products, Canada.

POULTRY STATISTICS

35. Egg Production, Sales and Farm Value.
36. Disposition and Value of Egg Sales.
37. Production of Poultry Meat.
38. Per Capita Consumption of Poultry and Poultry Products, Canada.

OTHER LIVESTOCK STATISTICS

39. Production, Farm Value and Disposition of Shorn Wool.
40. Number of Beekeepers, Colonies of Bees, Production and Value of Honey and Wax.
41. Number of Fur Farms, Pelts Produced and Farm Value.

FIELD CROP STATISTICS

42. Wheat & Oats for Grain, Acreage, Production, Farm Price and Value.
43. Barley & Grain Corn, Acreage, Production, Farm Price and Value.
44. Potatoes, Acreage, Production, Farm Price and Value.
45. Tame Hay, Acreage, Production, Farm Price and Value.
46. Tobacco, Acreage, Production, Farm Price and Value.
47. Fodder Corn, Acreage, Yield per Acre and Production.

FRUIT & VEGETABLE STATISTICS

48. Apples, Production, Farm Price and Value.
49. Apple Production by Varieties.
50. Pears, Production, Farm Price and Value.
51. Plums, Production, Farm Price and Value.
52. Disposition of Strawberry Production & Percentage Distribution of Strawberry Production.
53. Strawberries, Production, Farm Price and Value.
54. Raspberries, Production, Farm Price and Value.
55. Lowbush Blueberries, Production, Farm Price and Value.
56. Highbush Blueberries, Production, Farm Price and Value.
57. Cranberries, Production, Farm Price and Value.
58. Grapes, Production, Farm Price and Value.
59. Vegetable Acreage Planted.
60. Selected Vegetables, Acreage Harvested, Production and Farm Value, 1989.
61. Foreign Imports of Fresh Fruit & Vegetables in Atlantic Canada.
62. Seasonal Average Weekly Wholesale Paying Quotations for Nova Scotia for Fruit & Vegetables, Halifax.

CLIMATIC CONDITIONS

63. Graphical Summary of 1990 Growing Season.
64. Temperatures, Precipitation and Sunshine, Canadian Department of Agriculture Experimental Farm, Kentville, Nova Scotia.
65. Temperatures, Precipitation and Sunshine at Canada Department of Agriculture Experimental Farm, Nappan, Nova Scotia.
66. Temperatures, Precipitation and Sunshine at Nova Scotia Agricultural College, Truro, Nova Scotia.
67. Average Temperatures ($^{\circ}\text{C}$) and Total Precipitation (%) Departures from Normal During 1989.

MISCELLANEOUS STATISTICS

68. Sales and Farm Value of Maple Products.
69. Greenhouse Operation, Nova Scotia.
70. Farm Use of Limestone, by Counties & Province Nova Scotia.
71. Fertilizer & Limestone Sales, Atlantic Provinces.
72. Feed Freight Assisted Shipments to Nova Scotia by Grain.
73. Principal Manufacturing Statistics by Selected Food Industries, 1987.
74. Nova Scotia Agricultural Related Foreign Exports by Product Group and Destination, 1989.
75. Nova Scotia Agricultural Related Foreign Exports by Product Group.
76. Weekly Per-Capita Food Expenditures by Province, 1986.
77. Consumer Price Indexes for Food by Subgroup and Selected Items, Canada.

TABLE 63

CLIMATIC CONDITIONS

Graphical Summary of 1990 Growing Season

The growing season started poorly in Nova Scotia with April receiving approximately 80% more precipitation than normal. This trend continued into May as most regions in the province received over 175 mm of rain which is more than twice the 30 year normal. The May average temperatures were about 1°C below normal and the hours of sunshine were down 20% from normal, this combined with the high amounts of rainfall resulted in poor field working conditions for the spring.

Precipitation totals for the month of June were quite variable as they ranged from 68% above normal to 56% below normal. Average temperatures for June were 1°C above normal and increased the seasonal heat units to around normal for that time of the season.

July continued with above average temperatures while minimal rainfall in the first half of the month resulted in below normal precipitation totals.

Drought-like conditions occurred in many locations throughout the province in August as the average temperatures were 2°C to 4°C above normal and rainfall amounts were down substantially in most parts of the province. Seasonal heat units were up by as much as 20% at some locations for that time of the season.

September brought more above average temperatures and approximately normal rainfall amounts to the province.

Precipitation totals for the month of October ranged from 9% above normal to 99% above normal. In maintaining the summertime trend the average temperatures were 2°C to 3°C above normal. The above average temperatures and generally cloudy conditions resulted in the first fall frost being about two weeks later than normal.

Detailed monthly weather statistics for the season are presented in Tables 64, 65 and 66. Departures from the normal precipitation and temperature can be found in Table 67.
